

# Housing Inventory Count (HIC)

January 25<sup>th</sup>, 2023

***The Point-In-Time count is a different survey that will need to be filled out for every guest***

**PLEASE NOTE:** Complete a HIC for each unique program type at the agency.

**1. Program Type - Check ONLY ONE**

Program Type	
Temporary Housing	
	Emergency Shelter
	Transition Housing (includes Interim Housing)
	Safe Haven
Permanent Housing	
	Permanent Supportive Housing (PSH)
	Rapid Re-housing (RRH) (Includes SSVF)
	Other PH (OPH) – consists of PH – Housing with Services (no disability required) and PH – Housing Only

**Inventory Type– Bed Capacity** mark inventory type with an “X”

- a. \_\_\_ Current (Available for Occupancy on or before 1/25/2023)
- b. \_\_\_ Under Development (funded, but not available until after 1/26/2024)

**Housing Type** Site-Based is for agencies where the housing subsidy stays with the unit and the leases are often in the agency name. **Example:** Marion Apartments would be a Site Based-Single Site because they have one building that the units are located in and they own the building. MESI Opportunities program is Site Based- Clustered – Multiple Sites because the units are master leased by the agency and the subsidy stays with the unit.

Tenant-Based are going to be any voucher programs or programs where the units are leased by the tenant with the lease in the tenant’s name. The subsidies go with the client, not the unit (e.g. Section 8 programs, Rapid Re-housing programs, etc.)

**Check ONLY ONE (If program is multiple types, submit separate HICs)**

	Site-Based Single Site
	Site-Based Clustered/Multiple Sites
	Tenant-Based Scattered Site –zip code _____

Enter an address for all projects that are Site-Based. If a Site-Based project has multiple sites, enter the address for the site where most beds and units are located. For Tenant-Based Scattered Site projects, enter the zip code (in the table above) where most beds and units are located.

4. **Target Population:** The subpopulation served by provider program, if applicable. A population is considered a "target population" if the provider program is designed to serve that population and at least three-fourths (75 percent) of the clients served by the provider program fit the target group descriptor. Note that a single provider program may not have more than one Target Population

	Domestic Violence Victims (DV)
	Persons with HIV/AIDS (HIV)
	Not applicable (NA)

5. **Is your program HUD McKinney-Vento funded?**

**Check all that apply (Note: Separate programs require a separate HIC)**

**Answer the following questions about bed capacity for the night of January 25th, 2023.**

**Answer every question; if the answer is zero, then place a zero in the space provided.**

- 7. Total number of available Year-Round beds \_\_\_\_\_
  - 8. Total number of people in those beds on the night of 2/22/2022 \_\_\_\_\_
  - 9. How many of the total beds are typically dedicated to Families with children? \_\_\_\_\_
    - 9a. Number of unique units/rooms/apartments these beds are in? \_\_\_\_\_
    - 9b. How many of these beds are recorded into HMIS? \_\_\_\_\_
  - 10. How many of the total beds are typically dedicated to Singles/Individuals? \_\_\_\_\_
    - 10.a How many of these beds are recorded into HMIS? \_\_\_\_\_
- NOTE: Response to #9 + #10 must equal #7

- 11. (Emergency Shelters Only) Does the program provide seasonal beds?  
***Seasonal beds are not available year-round, but instead are available on a planned basis with set start and end dates during an anticipated period of higher demand.***

Yes \_\_\_\_\_ No \_\_\_\_\_ If yes, how many beds? \_\_\_\_\_

Does the program track the number of seasonal beds in HMIS?

## Dedicated Beds

**Dedicated means the bed *must* be filled by one of the following target populations who qualifies for the project unless there are no qualified applicants in the region.**

13. Number of Beds dedicated to chronically homeless individuals or families \_\_\_\_\_

13a) Of those beds, how many are dedicated to:

Individuals \_\_\_\_\_

Families \_\_\_\_\_

14. Number of beds dedicated to veterans and veteran's families \_\_\_\_\_

## Household Type Definitions:

The number of beds and units available for each of the following household types:

- **Households without children (Singles/Individuals):** Beds and units typically serving households with adults only. This includes households composed of unaccompanied adults (including unaccompanied youth 18-24) and multiple adults (including households with multiple youth ages 18-24).
- **Households with at least one adult and one child (Families):** Beds and units typically serving households with (at least) one adult and (including youth ages 18-24) and one child.
- **Households with only children (Unaccompanied Youth):** Beds and units typically serving households composed exclusively of persons under age 18, including one-child households, multi-child households or other household configurations composed only of children. For projects that have inventory designated for use by households with only children, care should be taken to ensure that this inventory is included on the HIC only in the category of households with only children, and not in the category for households with at least one adult and one child.

For projects where the number of beds per unit varies or beds can be used by different household types, or the precise number of beds are not typically being used by a particular type of household, the total number of beds could be distributed among the household types served by the project using one of the methodologies described below. These same approaches can be used for determining the number of dedicated beds for youth, veterans, and people who are chronically homeless.

- Divide the beds based on how the bed(s) were used on the night of the HIC. If the facility is not at full capacity on the night of the count, then extrapolate the distribution based on the pro-rated distribution of those who are served on the night of the count.
- Divide the beds based on average utilization. For example, a project has 100 beds that could be used by either households with only children or households with at least one adult and one child. If one-half of the beds are used by persons in households with only children on an average night and the other half are used by persons in households with at least one adult and one child, then include 50 beds for households with only children, and for the 50 beds for households with at least one adult and one child in the HIC.
- Projects with a fixed number of units but no fixed number of beds can use a multiplier factor to estimate the number of beds (e.g., a program with 30 units and an average household size of 3 equals 90 beds for households with at least one adult and one child).
- (A "unit" holds the beds. So, for a big open space like a Salvation Army that holds 50 beds in one room, that's 1 unit and 50 beds. If there's an apartment that has two bedrooms and three beds, that is 1 unit and 3 beds. In this case, the apartment is the overall unit that holds the beds.)
- Year-Round Beds/Units: Year-round beds and units are available on a year-round basis. For all the relevant programs types other than rapid re-housing, CoCs should record all the dedicated homeless beds and units available for homeless persons on the date of the inventory count (whether new, current, or under development), regardless of whether the program is a Contributory HMIS Program (see definition in Appendix B) or receives HUD funding, and regardless of whether the bed was occupied.
